

# YUKI TANAKA

Shimizu-ku, Miyakoda 2-10-8, Japan  
soffuture28@gmail.com / + 090-9876-5432

## SUMMARY

Innovative and results-driven software engineer with extensive experience designing, developing, and deploying secure, scalable, and high-performance solutions across web, mobile, and blockchain platforms. Skilled in backend architecture, smart contract development, and cloud-based systems, with a strong track record of delivering cutting-edge applications for high-profile clients. Adept at leading technology strategy, implementing robust security protocols, and optimizing development pipelines to achieve operational excellence. Passionate about leveraging advanced cryptography, zero-knowledge proofs, and modern frameworks to create reliable and forward-thinking software solutions.

## MAIN ROLE

- Backend Engineer
- Frontend Engineer
- BlockChain Engineer

## SKILLS

- Full stack development
- Blockchain architecture
- Software development lifecycle
- Cloud infrastructure
- Security evaluation and automation
- Project coordination and critical thinking

## EDUCATION

**Bachelor of Science:** Computer Science Major in Software Technology  
Shizuoka University, Shizuoka. Japan

03/2016

## EXPERIENCE

**Blockchain Engineer** / RASTA FINANCE

12/2021 - 10/2024

- Developed and deployed DEX, NFT marketplaces, and various staking and farming contracts, including financial NFT staking solutions.
- Designed and implemented smart contracts to ensure secure and efficient decentralized operations.
- Integrated blockchain-based systems with front-end applications for seamless user interaction.
- Collaborated with a team to deliver scalable and innovative decentralized solutions.

**Senior Web3 Engineer** / Automatic & Blizzad

06/2020 - 11/2021

- integrate smart contract using web3 and built back-end using Node.js.
- Used critical thinking to break down problems, evaluate solutions and make decisions.
- Built website front-end using React materialUI.
- Adapted to evolving project requirements, continuously learning and applying new technologies to improve development efficiency.

- Involved in the team works to build many defi websites and mobile applications.
- Worked on the development and implementation of new blockchain technologies.
- Collaborated with colleagues from other departments and participated in the creation and testing of new software applications.
- Built REST APIs, and integrated lots of payment apis something like Paypal, Stripe.
- Analyzed blockchain threats with thorough reviews of untested code and unprotected keys.

Senior Full Stack Developer / Venture Aviator - NY, USA

- contributed to the company becoming the 12th-fastest-growing corporation in the US
- Used NodeJS, ORM and SQL/No-SQL to develop and manage databases.
- Collaborated with fellow engineers to evaluate software and hardware interfaces.
- Worked with back-end developers to design APIs.
- Provided software application engineering and maintenance for development lifecycle.

Front End & Mobile Developer / KAYIDEAS

- Worked on many mobile projects such as payment API integrations, booking apps, real-time tracking apps and web projects (ecommerce, betting, etc).
- Promoted store loyalty program to increase customer engagement and drive consistent sales.
- Cultivated professional relationships with guests, improving customer retention through coordinated service.
- Input customer data into reservation systems and updated to reflect room changes.
- Trained team members in successful strategies to meet operational and sales targets.

PROJECTS
